

## LED Dimming Controllers

E9X-DUV-10VTP

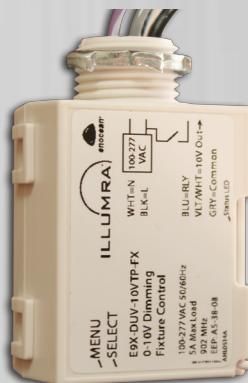

### Area Dimming Controller

0-10V 20A

- Full 20A circuit switching capacity
- Control multiple fixtures by daisy-chaining the 0-10V control signals between fixtures
- Master capable

E9X-DUV-10VTP-FX

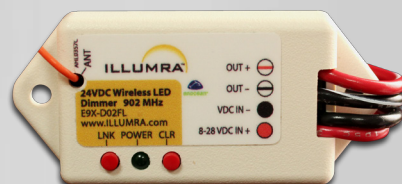

### Fixture Dimming Controller

0-10V 5A

- One per fixture
- Eliminates the need for adding control wiring between fixtures
- Slave capable

E9X-D02FL

NWO-D02FL (wired)

### PWM Dimming Controller

Constant Voltage 0-28VDC

- Smoothest dimming at low levels
- Wired version also available
- Slave capable

## Sensors and Switches

E9T-S1Axx

### Wireless Switches

- Wireless and battery-free, generates its own power
- Control and dim an unlimited number of lights
- Mount anywhere or easily replace current switch

NWO-IP710

### 0-10V Dimming Slider

- Easy, precise control of lighting levels
- Reduce flicking and maximize dimming range for LED and CFL bulbs
- 120-277 VAC

E9T-OSx

### Occupancy Sensors

- Wireless and battery-free, runs off ambient light
- Wall mounted and ceiling mounted models

E9T-TAP-21U

### Daylighting Sensors

- Wireless and battery-free, runs off ambient light
- Measure the light in a room and adjust lights to a specific level
