

Kitchen-Family Room Remodel

ILLUMRA Case Study

www.laurenillumination.com

www.illumra.com

Most homes over time are in need of upgrading at some point. This customer's desire was to upgrade lighting fixtures throughout his kitchen and family area. Not wanting to spend a lot of money and tear out walls, he turned to ILLUMRA agents to help craft out a cost effective and efficient solutions.

THE CHALLENGE:

- Home Owner request for LED CAN Lighting in Kitchen / Family Room Remodel.
- Difficult / impossible to place CAN lights in ceiling where requested.
- Home Owner required 3 Zones of LED CANs: Kitchen, Eating Area, TV Area.
- Home Owner required dimming Control in all three zones.

THE SOLUTION:

- Use Lauren Illumination LED CAN Lighting.
- Use Illumra wireless, battery free Constant Voltage LED Lighting & Dimming Controls.

PARTS USED

Single Rocker Switch - White
E9T-S1AWH

Dual Rocker Switch - White
E9T-S2AWH

Low Voltage PWM Dimmer
E9X-D02FL

THE RESULTS:

- Lauren Illumination 24 Volt 6" x .5" thick CAN lights.
- Illumra 902MHz wireless battery free Switches & Dimming controls.
- Clients extremely pleased with the result of the look and feel of install

BENEFITS TO CUSTOMER:

- Fast and efficient install
- Wireless switch placement - placement where needed, no restrictions.
- Lower install cost.
- Flat dispersed lighting – no glare as with traditional CAN cylinders.
- Dimming control by area.
